

VIVE LA CRISE !

VIVE LA CRISE!

Synopsis

Deforestation, property development, pollution, money, and a lot of food - all this is going to change...

The economic crisis is coming!

Director's Statement

With the first rumors about economic crisis, all the people start to panic - "we'll eat less, buy less, drill less, burn less and cut fewer forests!"...

I think we are too greedy.

The crisis is like fresh air to nature, a break for forests to grow, less pollution and more walking and sports, it looks like a victory of bicycle over engine.

I think this is great!

Well, in fact, the crisis is not the solution for all ecological, social and spiritual problems of today's society and of course, "Vive La Crise!" is just an optimistic point of view about effects of depression and a satire to our society.
